

AliveMax

VORTEX Technology

& S.L.I.M.

AliveMax

AliveMax **VORTEX** Technology

- * **Uses the Best that Nature offers.** Focus on ingredients that are both safe and effective. Tight control over raw material supply through detailed specifications and analysis.
- * **Formulates for Maximum Bio-availability.** Look at synergies between ingredients and the specific size of nutrients. Formulas must have carrying agents to maximize effectiveness.
- * **VORTEX Technology** microprocesses each nutrient to help ensure that each nutrient is delivered to the body in the most effective method possible, following strict cGMP guidelines.

**RAW MATERIALS
THAT DELIVER QUALITY
AND PERFORMANCE**

AliveMax Raw Materials

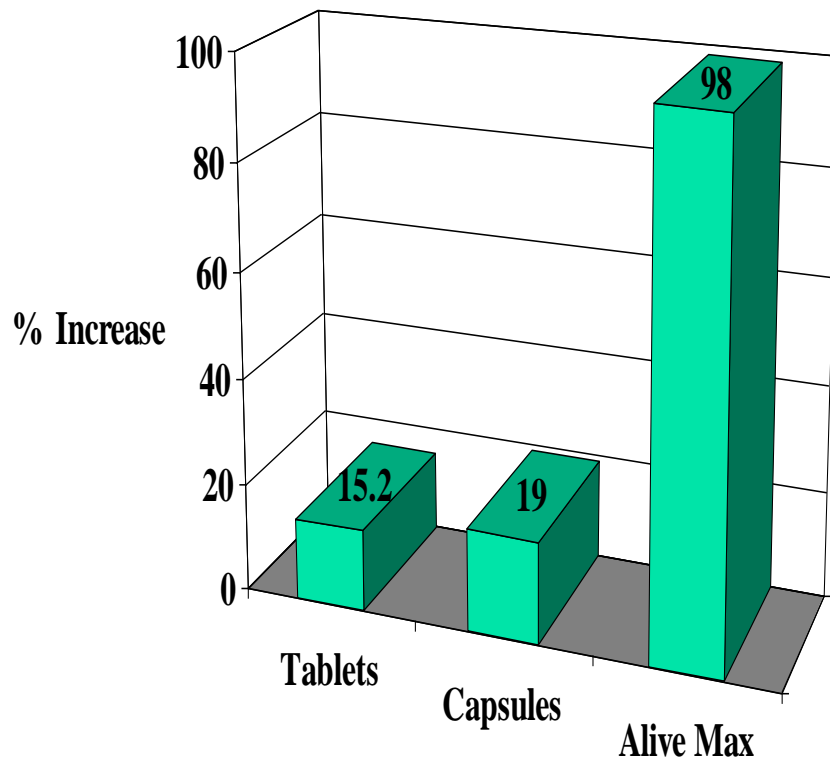

■ Alive Max
■ Industry Standard

Aloe Content in:

- **PURE means ALL of the GOODNESS that NATURE INTENDED.**
- **PURE means Not Diluted or Adulterated.** In a recent study of popular commercially available raw materials, the majority were found to be adulterated or diluted with cheap fillers.
- **PURE means Properly Grown, Harvested and Processed:** *Alive Max* follows strict guidelines in the way its raw materials are grown, harvested & processed.

Increased Bioavailability

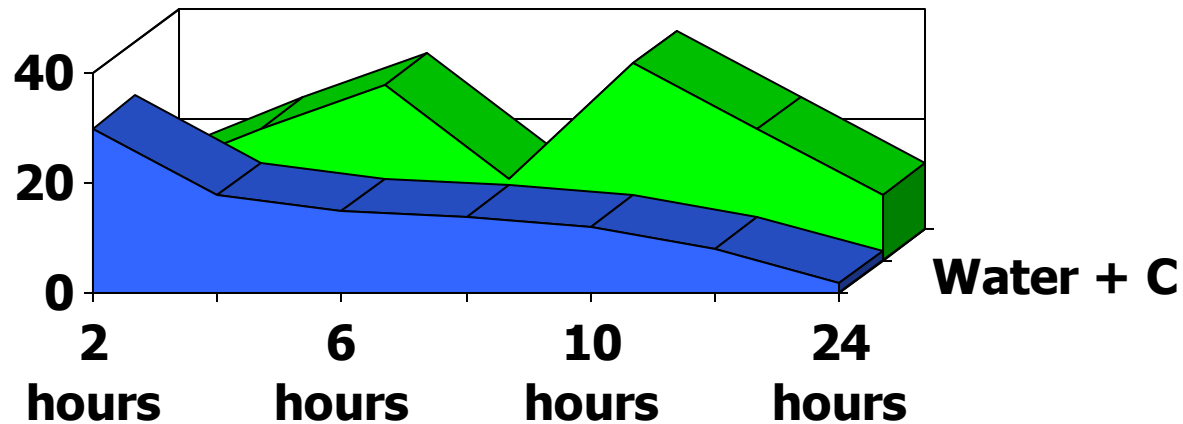

Alive Max, with

S.L.I.M.

KEY INGREDIENTS

- Aloe Barbadensis lea
- Acer Saccharinum Extract
- Caralluma Fimbriata
- Pinus Edulis /Pinus Strobilus extract
- Karela Mormordica Charantia
- Coleus Forskholli

The Science of *S.L.I.M.*

ACER Saccharinum: During the Krebs Cycle the body metabolizes carbohydrates. ACER Saccharinum can help decrease steps in the Krebs cycle that turns glucose from carbohydrates into fatty acids and cholesterol. Your body then metabolizes more carbohydrates and converts fewer carbohydrates into fat.

CARALLUMA FIMBRIATA and BITTER MELON: These natural appetite suppressants help to decrease hunger and increase feelings of satiety. 8 out of 10 people who tested the raw materials found either a “decrease” or a “significant decrease” in appetite and cravings.

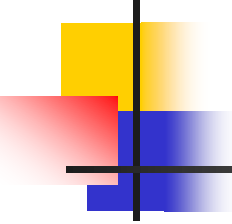

Coleus Forskohlii: This combination of nutrients helps to Burn Fat, Build Lean Muscle, and Increase Physical Performance.

AliveMax **S.L.I.M.** Ingredients

PINUS EDULIS / PINUS STROBUS:

- * Nature's Perfect appetite suppressant
- * Can give you control over your appetite
- * May help to eat less by promoting a feeling of 'fullness'
- * Scientifically proven to increase the release of satiety hormones e.g. CCK
- * 100% natural
- * Most effective when part of a healthy lifestyle and exercise plan

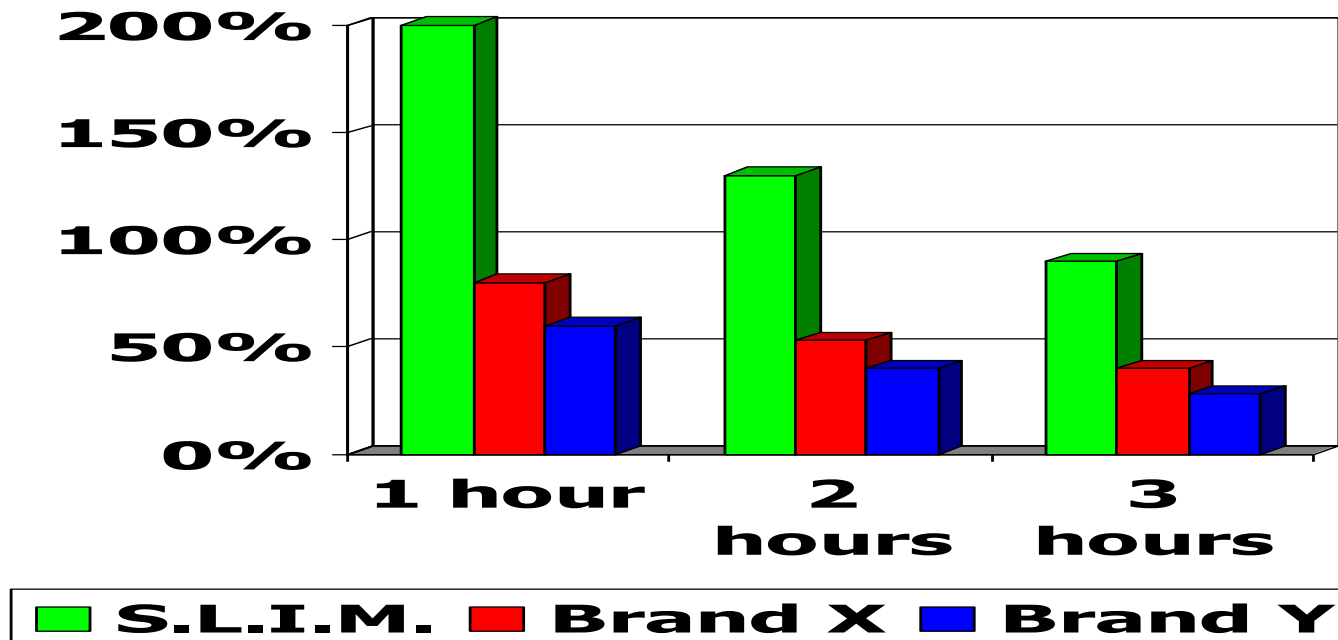

AliveMax **S.L.I.M.** Ingredients

- The **S.L.I.M.** Formula is specifically designed to reduce feelings of hunger by working with the body's natural processes.
- Specific hormones in our body send messages to our brain which trigger or reduce feelings of hunger. Alive Max **S.L.I.M.** works by stimulating the release of two hunger-suppressing hormones, CCK (cholecystokinin) and GLP1 (glucagon-like peptide 1). CCK and GLP1 send signals of satiation to the brain (similar to saying 'I am full') - which reduces the urge to eat.
